BARCELONA

THE ART OF MAKING BRUSHES SINCE 1933

Escoda®

BARCELONA

Founder: Josep Escoda Roig

Sons: Josep Escoda Sabatés & Ricard Escoda Sabatés

In the autumn of 1933, Josep Escoda Roig (1902-1982) founded in Sabadell, near Barcelona, a small business of paintbrushes for decoration and fine arts. It became the first factory in Spain, since artists had used brushes made in France and Germany until then.

This business' activity only stopped due to the Civil War, but at the beginning of the 1940s it resumed activities, despite the difficulty to get quality raw material. The Escoda brush factory developed and grew.

Josep's main objective was to make the best brush, and that's what he transmitted to his sons, Josep and Ricard, and they transmitted it to their daughter and sons, Anna, Ricard, Marc and Josep. Thus, it is the third generation of brush makers who love what they do, who know what the artist wants, and they are conscious of the fact that their industrial contribution is a small support to the world of art.

AQUARIO

This natural hair comes from the tail of a squirrel which lives in the region of Kazan, in the center of European Russia. It is the softest of all natural fine hairs and because of the hairs natural characteristics, it is the best in retaining liquid. It is the perfect choice for watercolour painting.

ÓPTIMO

Kolinsky sable hair is one of the perfect brushes for watercolour due to the result of the perfect combination of the best male and female hairs. It is considered one of the best types of hair for its softness and its natural spring. It is also valued in acrylic and oil painting to paint portraits or to finalize details of a piece of work.

BRAVO

This hair is extracted from the internal part of the ox's ear. It was possibly the same hair which the Paleolithic man used in cave paintings and the same one which the Egyptians used to decorate the inside of pyramids. Capable of holding a large amount of paint and is ideal for watercolour and oil painting.

BARROCO

One of the most popular synthetic hairs for watercolour. Made with fibre similar to the characteristics in white Toray, the Barroco series has a combination of superior diameters that allow for more spring. It has an exceptional point so artist's can work with one number of brush - medium or large - in an entire work.

PERLA

White Toray fibre is one of the softest and typically used in watercolour. The round brush combines three diameters and three different lengths, achieving a perfect tip. It has a capacity to retain a large amount of paint.

ÚLTIMO

An almost perfect imitation of squirrel has been achieved with this artificial hair. Thanks to the special fibre in this Último series, extraordinary softness and a capacity to retain liquids is achieved which is virtually the same as that found in the natural squirrel hair. The Último series could become a synthetic hair benchmark to gradually replace natural hair in the future.

PRADO

It is one of the most valued synthetic matters because of its similarity to sable hair. It not only imitates its color, but it also imitates its spring and absorption of liquids. Thanks to the perfect combination of three different diameters and three lengths in the fibres, the brushstroke's result is the same as one made of natural hair.

VERSÀTIL

The perfect synthetic alternative to the Kolinsky sable. Was designed with versatility as its main feature and really lives up to its name with exceptional snap, superior absorption and fluid retention. It's excellent for use with watercolour and oil /acrylic, allowing artists to create fine details as well as providing superior performance for coloring large areas and backgrounds. The feedback from artists has been extremely positive.

ÓPTIMO

Kolinsky sable hair is one of the perfect brushes for watercolour due to the result of the perfect combination of the best male and female hairs. It is considered one of the best types of hair for its softness and its natural spring. It is also valued in acrylic and oil painting to paint portraits or to finalize details of a piece of work.

BRAVO

This hair is extracted from the internal part of the ox's ear. It was possibly the same hair which Paleolithic man used in cave paintings and the same one which the Egyptians used to decorate the inside of pyramids. Capable of holding a large amount of paint and is ideal for watercolour and oil painting.

PERLA

White Toray fibre is one of the softest and typically used in watercolour. The round brush combines three diameters and three different lengths, achieving a perfect tip. It has a capacity to retain a large amount of paint.

VERSÀTIL

This brush was designed with versatility as its main feature and Versàtil really lives up to its name with exceptional snap, superior absorption and fluid retention. It's excellent for use both with watercolour and oil / acrylic, allowing artists to create fine details as well as providing superior performance for coloring large areas and backgrounds. A new alternative to the synthetic brush world.

ANTONIO LÓPEZ GARCÍA

Considered the father of the hyperrealist school of Madrid, is one of the most authentic artists belonging to Spanish contemporary realism. His work is notable for its analytical sense of reality. He is an artist who searches for the everyday aspects in the world around him, paying incredible attention to detail. Temporality and deterioration of his subject matter are concepts which define his hyperrealist style. In his words, "truth replaces old age".

Round pointed travel brush

CONRAD ROSET

From a young age and from an academic training he decides to fix the starting point of his career in the expressionism field. It is from there that he explores several ways to deal with his major theme: the female sensuality. An undeniable sensuality that he achieves through a brave use of color. His brush traces, but it also stains, drenches, drips... Conrad Roset uses the brush like a juggler and he sets off fireworks on the spectator's look.

GUILLERMO MUÑOZ VERA

Critics consider Vera to be a part of the second generation of Spanish realists and many laud him as one of the most brilliant of the group. The surprisingly polished result of his works have placed Vera in the Realism art world, notably due to his hyperrealist tendency to maintain a connection with the photographic vision of framing and the faithful translation of the scene. Vera is considered the archetype of Spanish New Realism today. He typically uses small round brushes to create his exceptional and hyperrealist works of art.

JOHN YARDLEY

He is a leading expert in mainstream watercolour whose work is known over three continents. A master of simplification, he prefers the intimacy of interiors and streetscapes to wide open landscapes. His lightness of touch is remarkable for its spontaneity and the ability to capture movement with limited well-placed strokes. His work is the subject of many publications and DVDs.

JULIA BARMINOVA

Born in Moscow, since 2012 she has worked in watercolour technique, combining the classical school with her own exclusive methods. She travels and conducts master classes in different countries. During trips to the fishing villages and the largest port cities of America, Europe and Russia, Julia has begun her currently most famous series of watercolours: "Islands in the Stream", dedicated to the play of light and color on the water surface and to the structure and configuration of ships, boats and yachts. Also this artist's favorite topics are bicycles, flowers, textured sketches and gothic architecture.
